Complete RO Screen

Sampling Instructions

Please read all of the instructions before starting.

1 - Freeze Ice Pack

After the blue ice pack has been in your freezer for at least 8 hours, you can collect your water sample from an appropriate water faucet or spigot. If the spout has a strainer or aerator, remove it prior to sampling

2 - Fill Samples

Samples must be shipped the same day they are collected via guaranteed next day delivery and must be collected after 1:00 p.m. EST to minimize time in transit. Do not collect and/or ship your samples on a Friday, Saturday, Sunday, or the day before a National Holiday.

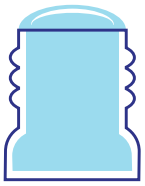

Fill all of the bottles, without rinsing as they may contain preservative necessary to ensure accurate results.

Bottle 1 - Fill the largest plastic bottle to the shoulder and replace the cap securely.

Bottle 2 - Fill the smallest plastic bottle to the shoulder and replace the cap securely.

Bottles 3 & 4 - Fill each of the two glass vials in such a way that a "dome" of water stands above the rim [see picture]. This can be done easily if you reduce the water flow to a slow stream. Replace the cap securely, but do not over tighten. Tip the vial upside down and check for air bubbles. If you see an air bubble, remove the cap and slowly add more water to displace the air bubble. Recap the vial and check again for air bubbles. Repeat this step until you do not see any air bubbles.

3A - Complete Lab Form

Complete the enclosed lab form, making sure to indicate the collection date and time you sampled, type of water, and sample identification (e.g. kitchen sink, well head,etc.) Return the blue ice pack to the kit and place the kit back in the cardboard box with the completed lab form.

3B - Ship Kit

Make arrangements to ship the kit by guaranteed next day delivery [or drop the kit off at our laboratory within 24 hours of collection, Monday to Friday, 8:30 am to 5:00 pm] to the following address:

National Testing Laboratories
556 South Mansfield Street
Ypsilanti, MI 48197

If we do not receive your sample within 24 hours of sample collection or if you have not provided the date and time of collection, the bacteria results will be marked INVALID!

Save Money on Overnight Shipping!

Take advantage of drastically reduced overnight shipping rates by purchasing United Parcel Service labels from National Testing Laboratories.

Call for details at:
800-458-3330.

NOTE: Testing & reporting takes approximately 5-10 business days. Heavily contaminated samples may take longer to process. Turnaround time can vary due to laboratory volume. Results will be emailed upon completion.

-

The lab reserves the right to reject water samples that appear to be excessively contaminated as they may cause potential damage to laboratory equipment.
